**ECOFILING LAUNCHES;
SMB, CONSUMERS WORLDWIDE COLLABORATE
ON DOCUMENTS, PRESENTATIONS OVER THE WEB**

Software-as-a-Service Application Makes
Collaboration Quick, Easy, Inexpensive

BRISBANE, Australia, May 1, 2009 - Ecofiling (<http://ecofiling.com>), a Web-based service that allows users to collaborate worldwide, launched today, providing small- to mid-size business bank-quality data security to ensure the confidentiality of the documents while providing worldwide access. The site is the second to be launched by Sellerbyte, a Brisbane-based company that successfully unveiled 2Large2Email.com last year.

The Ecofiling software-as-a-service (SaaS) application permits companies to create private workspaces, upload company documents and share large files while maintaining full version control and document integrity. With a simple interface and no learning curve, companies with 5 to 500 users can be up and running in minutes.

“Today’s virtual companies might have back-office or development teams in Asia, sales and marketing in North America, and support operations in Europe,” said James Mackay, CEO of Sellerbyte. “Virtual teams, and even groups that might be in different corporate offices, need to be able to work together. Ecofiling provides a safe, secure and easy-to-use Web-based environment where users can work together effectively and efficiently.”

“Collaboration on documents and graphics is more than just a business application; it has become a social networking staple,” said <NAME GOES HERE>. “Companies have had complex and expensive collaboration tools for some time, and certainly will benefit from a cost-effective and easy-to-use Web-based solution. However, now social networkers also will find significant value and capabilities well beyond the rudimentary tools found on popular social networking sites today.”

A typical account, priced at \$3 per user per month, provides 1 GB of storage for each user. These accounts can store thousands of files, including documents, presentations, spreadsheets, videos, webinars, pictures and more. Due to the site’s built-in security, even company confidential human resources and financial data can be stored securely.

Free accounts, suitable for personal use and to put Ecofiling through its paces, are available at <http://ecofiling.com/free/>.

About Ecofiling:

Ecofiling provides SMB users and consumers with a Web-based, easy-to-use environment where they can collaborate and share information around the world in just minutes. The service uses Amazon Corp.’s world-class server infrastructure to store and protect data. Ecofiling purchases renewable energy equal to the amount of energy needed to run the site and all of its related equipment at no charge to the customer, neutralizing Ecofiling’s carbon footprint and making the site carbon neutral. For additional information, visit the company at <http://www.ecofiling.com>. Contact the company at <http://ecofiling.com/contact/>. The company is based in Brisbane, Australia and is a fully owned division of Manaccomm Corporation Ltd. (ASX:MNL), which is listed on the Australian Stock Exchange.
